

INTERNATIONAL PAYMENT PROCESSING

PayConex™ Plus

PayConex™ Plus provides secure payment processing for international transactions and offers a variety of solutions for mobile, unattended, retail, and MOTO backed by multi-currency processing and multi-lingual support. The platform features Bluefin's PCI-validated point-to-point encryption(P2PE) and EMV solutions for both merchants and integrated providers, including the GoChip™ SDK for EMV integration, as well as Ingenico RBA Terminal Support.

P2PE Devices

Ingenico ICMP

Ingenico ISC Touch 480

ID TECH SREDKey 2

BBPOS WisePad 2

See <https://www.bluefin.com/resources/p2pe-devices/>
for all current PayConex Plus devices

Gateway Features

- + Multi-Currency Processing
- + PCI P2PE and EMV
- + Recurring Payments
- + Tokenization
- + Hosted Payment Pages
- + Batch File Processing

GoChip™ SDK

The GoChip SDK is an easy to use library that handles communication with the PayConex Plus payment gateway. The SDK wraps a REST interface to the gateway but also implements client-side security, making it even easier to connect. Visit <http://gochip.payconexplus.com/doku.php> to get started.
